SUSMITA SHARMA

Business Analyst | Software Tester | IT Graduate

Sydney, NSW | +61 0420 620 756 | sharmasusmita223@gmail.com | LinkedIn: Susmita Sharma | GitHub: susmitasharmaa

PROFESSIONAL SUMMARY

IT graduate with hands-on project experience in business analysis and software testing through a university software engineering project. Experienced in documenting requirements, preparing user stories and use cases, creating test cases, and identifying software issues. Familiar with Jira and Agile/Scrum teamwork. Looking for an entry-level Business Analyst or Software Tester role where I can apply my skills and continue learning.

EDUCATION

Bachelor of Science (Hons) Computing / Information Technology

The British College Kathmandu | 2021 - 2024

First Class Honors

Master of Information Technology (Software Engineering)

Charles Darwin University |2025 - Ongoing

Currently undertaking postgraduate study in software engineering, with practical experience in Agile software development, business analysis and software testing.

PROJECT EXPERIENCE

TripMate – Travel Planning and Recommendation Web Application

Role: Business Analyst & Software Tester
Software Engineering Practice Project | Agile/Scrum

Business Analysis Responsibilities

- Gathered and analysed project requirements to identify user needs and expected system functionality.
- Developed and documented functional and non-functional requirements to guide system development.
- Prepared Software Requirements Specification (SRS), Business Requirements Document (BRD), use cases, user stories, and Entity Relationship Diagram (ERD).
- Organised and tracked project tasks in Jira and maintained project documentation throughout development.
- Collaborated with frontend, backend, and data team members to clarify requirements and ensure alignment between project objectives and implementation.
- Participated in Scrum meetings, project reviews, and presentation preparation.

Software Testing Responsibilities

- Developed functional test cases based on system requirements and expected user behaviour.
- Performed functional testing to verify that application features worked according to documented requirements.
- Identified, documented, and communicated defects and unexpected system behaviour to the development team.
- Supported defect follow-up and verification to help ensure identified issues were addressed.
- Validated application functionality against user stories and acceptance expectations.
- Collaborated with team members to improve application quality and maintain consistency between requirements and delivered features.

TECHNICAL KNOWLEDGE

Business Analysis: Requirements Gathering, SRS, BRD, User Stories, Use Cases, Process Analysis, Documentation
Testing: Functional Testing, Test Cases, Defect Reporting, User Acceptance Testing, Requirements Validation
Tools: Jira, GitHub, Microsoft Word, PowerPoint, Excel, VS Code
Technical: Python, SQL, HTML/CSS, Git/GitHub

KEY STRENGTHS

Analytical Thinking • Problem Solving • Communication • Teamwork • Attention to Detail • Agile/Scrum
