

Business Analyst Meeting Minutes	Date: 01/09/2026 Time/Location: 4:00PM, CDU Campus
Meeting with:	Susmita Sharma Devi Maya Pooja Tiwari Jenish Gurung
Purpose of Meeting:	The purpose of the meeting was to follow up on last week's Context Diagram and UML diagrams, check progress on Use Case Diagrams, and review each member's SRS functional requirements as they are expanded.
Notes	Jenish gave a brief recap of OraEarn's Context Diagram and the four UML diagrams shared last week, then outlined the plan to build a Use Case Diagram covering the Student/Worker and Aura AI advisor actors, and to continue expanding the SRS with one functional requirement subsection per feature. Other members shared similar progress on their own Use Case Diagrams and SRS sections.
Key notes	Decisions
Use case diagrams should focus on user goals rather than system steps. Keeping actors to a small, clearly defined set makes the diagram easier for developers to build from.	Each member will finalise their Use Case Diagram and continue expanding their SRS functional requirements ahead of the next meeting.
Action items	
The group discussed progress on Use Case Diagrams and SRS documentation, and checked that this work remained consistent with each member's BRD and earlier diagrams.	
Next steps	
Finalise Use Case Diagrams, complete SRS functional requirements sections, and begin drafting non-functional requirements ahead of the next meeting.	
Next meeting	Date: 8 th September Time: 4-7
